

EARTH DAY CELEBRATION

Dated: 22-04-25

World Earth Day is commemorated every year on April 22nd. It is an annual occasion celebrated by individuals all across the world. Our Earth is the only planet known to mankind that supports life.

In the month of April, our school celebrated Earth Day in a very mesmerizing manner. On this day, our little champs participated in a rally, speaking slogans and carrying banners. Our tiny tots watched a short movie on Earth Day and brought green-colored food in their lunchboxes.

In the higher classes, there was a Tagline/Banner writing competition. Students from grades III to X participated, creating banners with their creative ideas. Overall, it was a great time for students, who learned the value of trees, the environment, and the 3Rs (Reduce, Reuse, Recycle).
