

ENGLISH WORKSHOP

Dated on 23.08.2025

An English workshop for personality development was conducted on 23rd August. The workshop focused on spoken English, integrating communication skills with personal growth. It aimed to improve vocabulary, pronunciation, confidence, leadership abilities, and social intelligence by teaching fluency and grammar.

The sessions focused on refining communication skills, developing English skills, and mastering key academic and professional personality traits essential for success. Students were hesitating to participate but later demonstrated greater confidence in speaking and expressing their opinions.

Participants learned to use clearer language, listen actively, and employ appropriate body language to enhance their message. The workshop was highly recommended, and it was suggested that similar workshops be organized on a regular basis to provide ongoing support for students' personal growth and development.
